PAR Series

MODEL: PAR600

For flowering stage: turn on all switches.

This light includes IR (Infrared) LEDs which look dim/invisible, they are not faulty LEDs.

SAFETY INFORMATION

Dear users,

Thank you for choosing our products! Your decision to purchase this light will reward you with a high-grade product bringing joy to you and your plants. Please read this instruction carefully before using your lights.

Important safety information:

Handling. Set up your light in the operating environment that allows for adequate air circulation. Never push objects into the ventilation openings.

Indoor use only. Not water-proof, protect your light from dampness.

Power cord. Your AC cord has a three-wire grounding plug (a plug that has a grounding pin). This plug fits only a grounded AC outlet. If you're unable to insert the plug into an outlet because the outlet isn't grounded, contact a licensed electrician to replace the outlet with a properly grounded one. Do not defeat the purpose of the grounding pin.

Repairing. If your light needs service, please contact us. Opening the light to inspect or repair with our permission will not affect your existing warranty. However, if you open the light or install items in it without our permission, you risk damaging your light. Such damage isn't covered by the limited warranty.

Cleaning. When cleaning the outside of your light and its components, first shut off your light, then unplug the power cord. Use a clean, soft, lint-free cloth to wipe the light. Avoid getting moisture in any openings.

Extremely bright. Do not look directly at the LED bulbs when the light is on.

SPECIFICATIONS

- * R Switch: to turn on/off the R channel.
- * W Switch: to turn on/off the W channel.
- * B Switch: to turn on/off the B channel.
- * All cooling fans will work when you turn on any of switches.

Specifications:

Model:	PAR600	HID Replacement:	600W HPS/MH
LED Power:	600W	Vegetative Coverage at 34":	3x3ft
Actual Power Draw:	110V: 274W±3%; 220V: 264W±3%	Flowering Coverage at 26":	2.5x2.5ft
LED Quantities:	120pcs Epiled/Bridgelux LEDs	Use for:	all stages grow and flowering
Total Harmonic Distortion:	< 15%	Housing Dimensions:	14.1 x 11.8 x 3.5 inches 35.8 x 30 x 8.9 cm
Input Voltage:	AC100V-240V	Item Weight:	13.7 lbs
Frequency:	50-60Hz	Lifespan:	≥ 100,000 hours

Package includes:

- 1 x PAR600 LED Lighting
- 1 x Hanging Kit
- 1 x 6ft Power Cord
- 2pcs Adjustable Rope Hangers

USING SUGGESTIONS

1. Remove this lighting equipment from packaging.
2. Joining the buckles to the hanging holders one by one.
3. Hanging the light on a hard, stable bracket or the ceiling of grow tent with the carabiner.
4. Install this lighting equipment above your plants - Do not proceed unless it's safely and securely mounted.
5. Plug power cord into this lighting equipment (do not plug into wall yet).
6. Turn off all switches.
7. Power on this lighting equipment by plugging into wall socket and turn on the switch.

The following section will help guide you in the process of evaluating the best methods for each stage of plant growth. Like many other growers, you can also turn on three switches at the same time throughout the seeding and flowering stages of your plant life. Remember to properly adjust the height of your light according to your plants desired level for optimal growth.

PAR600	Height (above plants' canopy)	Using hours	Switch(B/W/R)
3-5 days Acclimation Period	42"-46"	10 on / 14 off	B & W on / R off
Seedlings/Young Vegetative	38"-42"	12 on / 12 off	B & W on / R off
Vegetative Stage	30"-38"	18 on / 6 off	Turn on all switches
Flowering Stage	22"-30"	12 on / 12 off	Turn on all switches

Adjust the height accordingly to desired coverage and how well each individual plants respond as the intensity increases. The key is to always observe your plants and listen to what they're telling you. If the leaves are pointing hard towards the light, they love it! Give them more! If they shy away or appear limp and unhappy, while all other components and environmental variables are correct, back off with the light! They'll let you know very quickly how they feel. This is of course... the key to horticulture in general.
