

## ULight 680W 6 Bar Full Spectrum LED

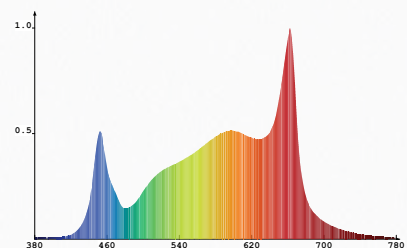

CODE:4280

ULight LED will increase the efficiency of photosynthesis, resulting in much more productive plants and compact growth.

Great results require the best equipment. U-Light will increase the efficiency of photosynthesis, resulting in much more productive plants and compact growth.

| FEATURES & BENEFITS                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | SPECIFICATIONS                                                                                                                                                                                           |
