LIQUID SCIENCE

Full Spectrum

MICROGREEN

Plant Food

SUITABLE FOR ALL STAGES OF PLANT GROWTH

Available in 1Litre, 5Litre, 25Litre and 5Kg Powder Pack

After extensive research and consultation with existing Microgreen growers about ways to enhance yields and flavour of their Microgreens lead our chemists and plant pathologists to jointly develop LIQUID SCIENCE Microgreen Plant food.

The **LIQUID SCIENCE Microgreen Plant Food** is a single part liquid that is ideally suited to all Microgreen varieties, which have crop specific nutrient needs. For Commercial applications LIQUID SCIENCE Microgreen Plant Food also comes in a 5kg A & B Powder Pack. Totally soluble, and super easy to mix.

The Liquid Science range is unique in its makeup of technical grade mineral salts and organically derived elements, which have excellent solubility, meaning that the plants can take up the minerals at a much faster rate than other fertiliser grade or organic specific brands.

Developed and manufactured in Australia, the Liquid Science range challenges similar imported products on both price and quality.

LIQUID SCIENCE MICROGREEN PLANT FOOD
4 x 5 KG A & B POWDER PACK (Bulk Pack)

Minimum guaranteed analysis of Liquid Science Microgreen nutrient

Minimum guaranteed analysis:	%
Nitrogen as Nitrate (N)	4.50
Nitrogen as Ammonia (N)	0.38
Nitrogen as Total Nitrogen (N)	4.88
Phosphorus as Water Soluble (P)	0.70
Potassium as Nitrate (K)	7.2
Calcium as Nitrate (Ca)	2.45
Sulphur as Sulphate (S)	1.20

Minimum guaranteed analysis:	%
Magnesium as Sulphate (Mg)	1.00
Iron as EDTA Chelate (Fe)	0.12
Manganese as Sulphate (Mn)	0.03
Zinc as EDTA Chelate (Zn)	0.0026
Copper as EDTA Chelate (Cu)	0.0012
Boron as Borax (B)	0.0077
Molybdenum as Sodium Molybdate (Mo)	0.0008
