

## Water Treatment Solution Guide

A simple way to select the best water treatment solution for your pond, waterfall, or fountain

## Understanding the Guide

This guide contains information about the complete line of Aquascape® Water Treatment Solution Products. Our goal is to help you identify and select water treatments that will keep your pond, waterfall, or fountain looking clean, clear, and beautiful.

Aquascape Water Treatments are sorted into the following categories: Simple Solutions, Beneficial Bacteria, Water Conditioners, Sludge Fighting, Algae Fighting, Problem Solving, and Fountain Treatments.

For further assistance, please see store associate.

## SIMPLE SOLUTIONS

---

- Maintain your water feature with our simple solution for tackling most water quality and clarity issues
- Choose the Automatic Dosing System or pump top bottles to dispense our specially-formulated water treatments
- Four treatment options are available for ponds and two treatment options are available for fountains and waterfalls
- Your simple solution for keeping water features clean, clear, and healthy

# SIMPLE SOLUTIONS FOR PONDS

The Automatic Dosing System for Ponds automatically, accurately, and consistently adds our specially-formulated water treatments to your pond or water garden, eliminating the guesswork and routine of manually adding water treatments.

Automatic Dosing System for Ponds

**Maintain for Ponds**  
Keeps ponds clean, clear,  
and healthy

**Clean for Ponds**  
Naturally reduces organic  
sludge and debris

**Clear for Ponds**  
Controls debris buildup and  
clears cloudy or discolored water

**Protect for Ponds**  
Reduces fish stress, prevents  
parasites and infections, and  
accelerates healing

# SIMPLE SOLUTIONS FOR PONDS

Aquascape Simple Solutions Pump Top Water Treatments for Ponds take advantage of the same comprehensive formulations designed for use with the Automatic Dosing System treatments. The easy-to-use pump top bottles make it easy to accurately add the correct amount of treatment for your water feature.

## Maintain for Ponds

Keeps ponds clean, clear, and healthy

## Clean for Ponds

Naturally reduces organic sludge and debris

## Clear for Ponds

Controls debris buildup and clears cloudy or discolored water

## Protect for Ponds

Reduces fish stress, prevents parasites and infections, and accelerates healing

# SIMPLE SOLUTIONS FOR FOUNTAINS

The Automatic Dosing System for Fountains automatically, accurately, and consistently adds our specially-formulated water treatments to your fountain or waterfall, eliminating the guesswork and routine of manually adding water treatments.

Automatic Dosing System for Fountains

**Prevent for Fountains**  
Prevents buildup of debris and scale in features without fish or plants

**Clean for Fountains**  
Cleans and clarifies features with standing water, plants, or fish

# SIMPLE SOLUTIONS FOR FOUNTAINS

Aquascape Simple Solutions Pump Top Water Treatments for Fountains take advantage of the same comprehensive formulations designed for use with the Automatic Dosing System treatments. The easy-to-use pump top bottles make it easy to accurately add the correct amount of treatment for your water feature.

## Prevent for Fountains

Prevents buildup of debris and scale in features without fish or plants
