BBA
BIOSOLUTION

Aqua Boost is a high-activity compound probiotic formula (with *Bacillus* spp. *Lactobacillus* spp. and *Rhodopseudomonas* spp.) suitable for various types of ornamental fish (such as goldfish, koi, guppies, discus, arowana, etc.). It can be applied through feed coating to support daily care, disease prevention, and immune enhancement.

ADVANTAGES

1. Improved Nutrient Absorption and Feed Efficiency.

- Break down complex food molecules
- Increase nutrient bioavailability
- Reduce uneaten feed waste
- Promote faster growth and better coloration

2. Balancing Gut Microbiota.

- Compete with and inhibit harmful bacteria (like *Vibrio*, *Aeromonas*)
- Produce organic acids and bacteriocins that suppress pathogens
- Maintain a stable gut environment

With Aqua Boost, fish showing lethargy and poor appetite exhibited a dramatic improvement in **vigor and appetite within 48 hours.**

3. Enhancing Immune System

- Activates immune cells such as macrophages and lymphocytes
- Increases antibody production (e.g., IgM in fish)
- Reduces stress responses and disease outbreaks

4. Reducing Waste and Improving Water Quality

- Decreasing the load on fish metabolism
- Preventing toxin build-up in the gut and tank

DIRECTION OF USE:

| Situation | How to Apply |
|--|--|
| Ornamental fish to improve digestion, gut health and immune defence. | <ul style="list-style-type: none">• Spray onto food evenly, then feed to fish immediately.• Repeat 1-2 times per day. |

Store in the closed, original container out of direct sunlight. Best stored between 5 - 45 °C for up to 18 months. DO NOT FREEZE.
