

Eco-Friendly Product

ALGAE BLASTER BENEFICIAL BACTERIA LIQUID SOLUTION

Rapid improvement with noticeable algae reduction in 3-10 days.

Proven results in eliminating ammonia, nitrites, phosphorus, organic matter, & odours.

Fast-acting bacteria strain suited for low-oxygen or anaerobic zones.

Safe for all aquatic life, even at higher doses, to support a healthy aquatic ecosystem.

READ SAFETY DIRECTION

Algae Blaster s is a high-performance **liquid bacteria formula** designed to effectively eliminate filamentous algae (string algae) and improve water clarity. Powered by fast-growing, locally selected beneficial bacteria, it works by depleting nutrients essential for algae growth and establishing a healthy, balanced microbial ecosystem.

Key Benefits:

- Visible algae reduction within 3 - 10 days
- Safe for fish, plants, and biological filters
- Breaks down sludge, uneaten feed, and excess nutrients
- Works in all water temperatures, for best performance, apply when water temperature is above 10°C
- Ready-to-apply liquid - no mixing or activation required

Apply evenly over the pond surface or directly on to algae or blanket weed. Avoid use with chemical treatments, UV, or ozone. **10ml** can treat up to **250L** water (Double or triple the dosage for **initial application** and **heavily polluted water**).

Safety: Avoid eye contact. If product gets into eyes, rinse immediately with water. Not for human consumption. Keep out of the reach of children.

Improper use or deviations from the recommended application guidelines as well as changes in water conditions may harm aquatic life. BBA Biosolution is not liable for such losses.
