BIO-FLOCCULANT BENEFICIAL BACTERIA

Effectively reduces sludge by decomposing waste through biofloc formation.

Proven results in eliminating ammonia, nitrites, phosphorus, organic matter, & odours.

Helps to reduce turbidity, improve transparency and visual clarity under favourable conditions.

Safe for all aquatic life, even at higher doses, to support a healthy aquatic ecosystem.

READ SAFETY DIRECTION

PurePond Bio-Flocculant is an innovative biological flocculant that combines natural microbial metabolites with efficient flocculation properties. It not only rapidly aggregates and settles suspended particles, but also improves the overall aquatic environment through biological activity, ensuring long-lasting water quality stability.

Directions of Use: Shake well before use. Avoid use with chemical treatments, UV, or ozone for 2- 4 days.

Suggested Dose Rate:

- **First - time use:** 20mL per 1,000L water. (Double or triple the dosage for heavily polluted water).
- **Regular maintenance:** use BBA PurePond Pond Maintenance liquid Beneficial Bacteria to keep the ecosystem healthy.

The above dose rate is a guideline that may need to be increased or decreased according to individual conditions, such as water pollution level, water body size and depth, algae density, water temperature, volume of suspended material etc. More accurate dose rates can be established by onsite testing.

Safety: Avoid eye contact. If product gets into eyes, rinse immediately with water. Not for human consumption. Keep out of the reach of children.

Improper use or deviations from the recommended application guidelines as well as changes in water conditions may harm aquatic life. BBA Biosolution is not liable for such losses.
