## ASSEMBLY INSTRUCTIONS

### STEP 1

Construct the metal tent frame by assembling the metal poles, corners, and connectors as per diagram. **To avoid damage, it is very important to check that all the poles are pushed completely into each corner/connector/joiner. Use a rubber mallet to gently tap fittings into the poles if necessary.**

Failure to do so will not only make the tent cover difficult to fit but may also stretch the seams and allow emissions of light from the functioning tent.

### STEP 2

Un-zip top and base zipper system from the FRONT SIDE (where it has **seaHawk** logo and see-through windows) all the way to the back side of the tent. **It is important you leave the zippers on BACK SIDE closed.**

### STEP 3

Locate the tents' ROOF (*Refer PIC A*) and place neatly and carefully over all 4 corners of the top frame, ensuring a snug fit.

### STEP 4

Slip the base section of the tent cover beneath the assembled frame. Ensure it fits in a neat and precise manner around the tent frame corners and sides (*Refer PIC B*).

### STEP 5

Carefully close the two large horizontal zipper systems simultaneously. You may have to push the upright poles in a bit as you zip around each corner (*Refer PIC C*).

### STEP 6

Attach shallow/deep bars, waterproof floor trays, and pouch in place along with the Nylon fabric straps.

## DISMANTLING OF SMART TENT

- 1 Ensure the tent is clean and dry before dismantling.
- 2 Reverse the operation as per above instruction. (**Step 6 > Step 5 > Step 4 > Step 3 > Step 2 > Step 1**) To ensure your **Smart Tent** maintains the same "lightproof" quality, always dismantle carefully and avoid stretching the seams of the tent cover.

seaHawk is distributed in Australia by Holland Forge PTY LTD.
